Jamaica Single Window for Trade (JSWIFT)

JSWIFT is a one-stop-shop electronic system that allows traders to submit information at a single point to fulfill all import and export regulatory requirements. It is a web-based solution available to the trader through a designated portal. JSWIFT will allow importers and exporters to apply for Licences, Permits, Certificates and any Other international trade related documents (LPCO) through a single portal. This system serves as a means of improving connectivity thereby facilitating the exchange of information between traders, customs offices and other border regulatory agencies (BRAs).

KEY FEATURES OF JSWIFT

- Single access point through a designated online portal
- Single access point for LPCO application
- Single submission of data with validation functionalities
- Synchronized data processing functionalities
- Single point for accommodating decisions related to Cross Border Trade
- Single payment
